

Grove Inc. is an exciting new project management firm with a passion for translating their clients' visions into reality. Specializing in the development and construction of boutique residential condominiums and custom homes, Grove provides complete project management services to developers and property owners alike.

We are looking for an enthusiastic, self-motivated, organized and detail-oriented individual who enjoys a variety of responsibilities to be part of our energetic team of professionals. This position provides valuable experience in the day-to-day running of projects and also fosters critical thinking and problem solving skills essential for a career in construction and development. In addition, this position provides exposure to both professional project management tasks as well as key hands on field experience through frequent project site visits.

#### **Architectural Technologist/ Asst. Project Manager**

Grove Inc. has an immediate opening for a Technologist in the Architectural Discipline (CAD/REVIT), to join our team.

Responsibilities include preparation of working drawings for residential projects and providing support to residential and condominium project managers.

Qualifications required:

- Architectural Technology Diploma
- Proficiency in AutoCAD and Revit
- Proficiency in building technologies and technical construction detailing
- Ability to work independently and as part of a well-organized team
- 5 years experience
